## Attachment A.

40. (Currently Amended) A system for providing distributed control of communication services, the system comprising:

an external processing module configured to provide signaling for establishment and teardown of a connection between a first network and a second network, the external processing module being further configured to apply a policy rule on traffic flow from the first network over the connection; and

an access module configured to communicate with a customer premise equipment coupled to the first network, the access module being configurable by the external processing module to support the communication services, wherein the access module selectively diverts portions of a message within the traffic flow to the external processing module for enforcement of the policy rule, and ~~a remaining portion of another message within~~ the traffic flow is forwarded to the second network.
